[View online](#)

Product engineer with 8+ years across backend/product engineering, support engineering, and startup operations. Led Support Solutions engineers at Smartly.io across customer, support, product, and engineering workflows; built internal automation, feedback loops, and developer docs; productionized business-critical data; and recently shipped two AI-assisted products end-to-end as a solo builder.

EXPERIENCE

Senior Product Engineer · [topi.eu](#)

Jul 2023 – Jun 2025 · Germany (remote)

Hardware subscription fintech — CoolBlue, Cyberport & MediaMarkt across Europe.

- Led end-to-end technical deployment for a €50M+ enterprise financing partner, owning stakeholder communication across Finance, Risk, Ops, Product, and Engineering from initial scoping through integration and production rollout.
- Designed, architected, and shipped [topi Elements](#) — a partner-facing UI integration library that reduced retailer integration time by 20%.
- Created the [topi Developer Docs](#) in 2 weeks, giving enterprise retail partners and sales teams a clear technical integration path.

Senior Software Engineer · [Shopify](#)

Feb 2022 – May 2023 · Germany (remote)

Retail engineering org — scaling Shopify POS from 20 to [1,000 physical locations](#).

- Shipped Shopify POS features across React/Rails in a fast-paced retail engineering environment, supporting scale from 20 to [1,000 physical retail locations](#).
- Managed complex pricing changes for POS Pro subscriptions, coordinating product, engineering, UX, and business stakeholders.

"Nick is technically strong, a fast learner and takes initiative to solve problems. He is a team player and a great communicator and will be a great value to any team."

— Justin Yek, VP Finance, Airwallex (was Nick's direct manager)

Support Solutions Engineering, Team Lead · [Smartly.io](#)

Jun 2018 – Jan 2022 · Singapore + Germany

Ad-tech unicorn. Joined as employee #203; grew through hyper-growth to 600+ employees.

- Owned the bridge between customers, support, product, and engineering, translating operational pain into internal tools and product feedback.
- Led Support Solutions engineers across EMEA/APAC, mentoring a team of 7 and improving technical support delivery, escalation handling, and internal tooling.
- Built internal escalation workflow and tooling across Jira, Airflow, Salesforce, Intercom, a Chrome extension, and a web app, reducing manual coordination and giving Support staff a faster path from customer issue to product/engineering follow-up, notifications, and closure.
- Designed and taught internal Tech Account Manager Bootcamp for APAC and EMEA cohorts, helping non-technical graduates move into Technical and Product roles.

"I've personally seen him rock it as a writer, as a team lead, as a software engineer, as a project manager, as a mentor, and as a brilliant coworker."

— Milan Rudez, Product Manager, Smartly.io (was Nick's teammate, then direct report)

Web Development Instructor · [General Assembly](#)

Dec 2016 – May 2018 · Singapore

Pioneer in global tech bootcamps. This is where my tech career began.

- 3 cohorts, 45 students, 100% graduation rate; 30 graduates placed as engineers or PMs.
- Published a [bootcamp review](#) that led to ~60 inbound messages from prospective students globally.

"Nick is very knowledgeable yet able to explain difficult concepts clearly. He was always approachable, made himself available outside office hours to solve queries, provide guidance debugging code, and keep our spirits up."

— Laura Gil Lasheras, Senior Production Controller, SAGE Publishing

FOUNDER TRACK

Founder

2025 – present · Remote

Left employment to build software products from zero to live users, solo.

- [album.so](#) — private family photo-sharing app. Built production web/iOS system end-to-end with auth, media uploads, storage limits, video processing, push notifications, and AI-assisted development workflow.
- [youtionary.com](#) — AI language-learning app using OpenAI APIs, Gemini real-time voice, personalized learning memory, Supabase, mobile/web delivery, and automated review generation. Built and deployed solo.

STACK & CAPABILITIES

Backend/API integration

AI agents & LLM APIs

React/Node/TypeScript

Ruby on Rails Python

SQL/DBT Supabase

Technical discovery

Enterprise deployment

Stakeholder communication

Developer docs
