My career has never followed a straight line. I started as a founder, became a teacher who taught 45 students to build software, then spent 8 years embedded inside fast-moving startups as the person who bridges engineering, product, data, and the customer. I helped enable a €50M financing deal through data engineering, shipped UI libraries that cut integration time by 20%, and built two live software products during a career gap — solo, from zero. A Forward Deployed Engineer needs to earn trust fast, build faster, and communicate across every layer of an organisation. That's been my entire 10-year career.

EXPERIENCE

Senior Product Engineer · topi.eu

Jul 2023 – Jun 2025 · Germany (remote)

Hardware subscription fintech — CoolBlue, Cyberport & MediaMarkt across Europe.

- Led a cross-functional data project spanning Finance, Risk, Ops, Product, and Engineering to productionize messy startup data: migrated spreadsheets to a DBT-powered, auditable production pipeline under live e-commerce load — directly enabling a €50M Macquarie debt financing deal. Reported to CPO.
- Designed, architected, and shipped [topi Elements](#) — a plug-and-play UI component library that reduced retailer integration time by 20% per partner.
- Created and authored the [topi Developer Docs](#) in 2 weeks; adopted by all retail partners for pre- and post-sales integrations.

Senior Software Engineer · [Shopify](https://shopify.com)

Feb 2022 – May 2023 · Germany (remote)

Retail engineering org — scaling Shopify POS from 20 to [1,000 physical locations](#).

- Managed product, engineering, and UX stakeholders to ship POS Pro pricing change for Shopify Plus merchants.
- Implemented scaling changes supporting 50x growth in [physical retail locations](#).

"Nick is technically strong, a fast learner and takes initiative to solve problems. He is a team player and a great communicator and will be a great value to any team."

— Justin Yek, VP Finance, Airwallex (was Nick's direct manager)

Support Solutions Engineering, Team Lead · [Smartly.io](https://smartly.io)

Jun 2018 – Jan 2022 · Singapore + Germany

Ad-tech unicorn. Joined as employee #203; grew through hyper-growth to 600+ employees.

- Led and mentored a team of 7 software engineers.
- Built "Shifts" — internal booking automation saving 1 hr/month per employee.
- Delivered cross-team bug-notification automation using Jira, Python Airflow, and internal APIs, saving 3 hrs/week of manual work.
- Designed and taught internal Tech AM Bootcamp to 15 colleagues; 4 transitioned into Technical or Product roles.

"I've personally seen him rock it as a writer, as a team lead, as a software engineer, as a project manager, as a mentor, and as a brilliant coworker."

— Milan Rudez, Product Manager, Smartly.io (was Nick's teammate, then direct report)

Web Development Instructor · [General Assembly](https://generalassembly.com)

Dec 2016 – May 2018 · Singapore

Pioneer in global tech bootcamps. This is where my tech career began.

- 3 cohorts, 45 students, 100% graduation rate; 30 graduates placed as engineers or PMs.
- Published a [bootcamp review](#) that led to ~60 inbound messages from prospective students globally.

"I had the privilege of being taught by Nick during my time at General Assembly. Nick was one of the better educators I ever had in my learning journey. Nick is patient, logical, and approaches every single challenge with a zealous attitude. I am really honoured to have been taught by such a marvellous educator."

— Zhao Loong Ng, Software Engineer, GovTech Singapore (was Nick's student)

FOUNDER TRACK

Founder

2025 – present · Remote

Left employment to build software products from zero to live users, solo.

- [album.so](#) — photo memory app, live with real users. Built end-to-end.
- [youtionary.com](#) — language learning tool, live with real users. Built end-to-end.
- Orchestrating multiple AI agents in parallel via [pi.dev](#) — a lean, fully-controllable agent harness.

Founder · Flowriter

2015 – 2016 · Singapore

- Conceptualised and built Flowriter — a distraction-free e-ink laptop for writers. First zero-to-one product experience before my first professional job.

STACK & CAPABILITIES

TS/JS React/Node

Ruby on Rails Python
